About Us

We are established since 2009

Comjagat Technologies provides end-to-end software solutions for private, government, and state agencies.

It combines state of the art solution design, robust back-end systems with efficient project management in a single turnkey solution for national IT infrastructure undertakings. Comjagat solutions range from National Trainings, online AGM solutions, e-commerce payment processing, and fintech solutions. In addition,

Comjagat provides highly specialized system integration of 3rd party hardware/software with legacy systems, including identity governance, Enterprise Single Sign-On, identity, and access management solutions to large organizations like banks, telecom companies, and multinational companies.
